

Always-on  
challenger

UMAP-2

Harm

Notes

Each row fits its own UMAP on that row's Recovery/Harm endpoints (same as separate single-row figures).

Arrows: baseline ● → target ○.

HF1 target:

KEEP = baseline embed  
REPLACE = challenger.

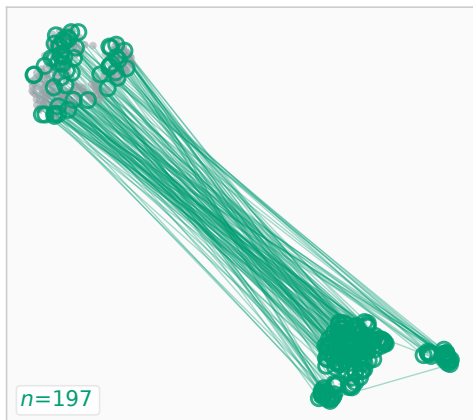

Violin y-limits shared across rows for fair  $\|\Delta\|_2$  compare.

Counts (rec / harm / nc)

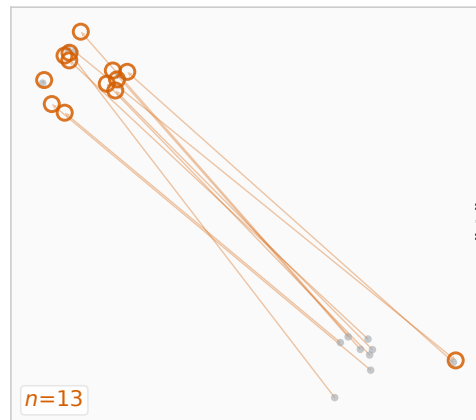

Challenger 311 / 286 / 1212  
HF1 197 / 13 / 1599
